

Nitro for Enterprise

The fastest, smartest way to PDF for business.

Accelerate Document Productivity Across Your Organization

Enhanced User Interface

Perfectly familiar for Office 2016 users

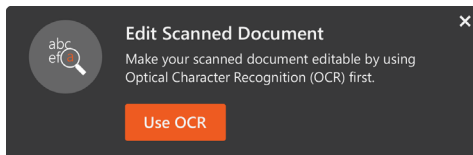

Office 2016-style refresh introduces new themes, color, layout, and improved Backstage view.

Accomplish more, with fewer clicks

Reorganized Home tab contains the most commonly used features.

Works the way you do

New Add Tools feature lets you customize your Home tab with the tools you use most.

Shorter learning curve

Faster onboarding for new users

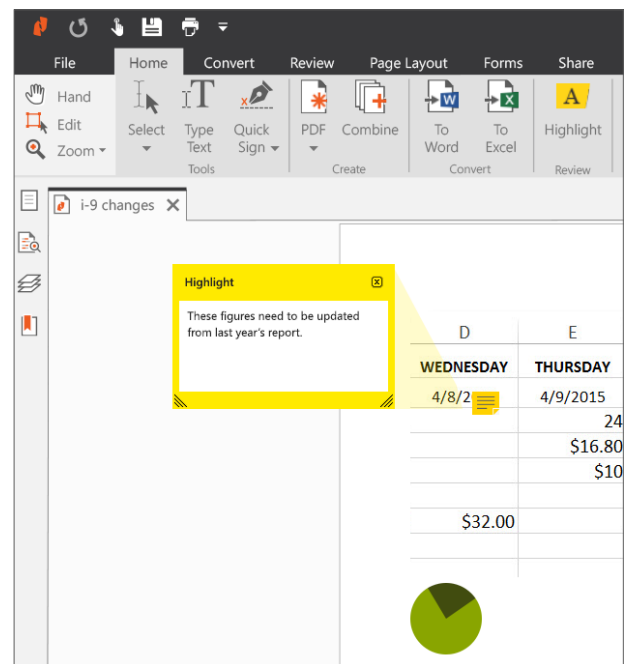

Revamped Product Tour shows users how to use the most impactful features.

Continual improvement through usage data

Regular release updates based on user activity and insights on new features.

Intelligent help when users need it most

New Smart Tips suggest features to users contextually, based on the actions they take.

Improved speed and quality

Performance improvements for large files

Open large documents significantly faster.

Improved, high-fidelity OCR

New pre- and post-processing techniques ensure more accuracy in document layout and design.

More customizable layout and printing options

Expanded print layout support with new Booklet printing and improved Multiple Pages.

PDF Productivity That Truly Scales

Broader accessibility and security

More cloud storage integrations across all platforms

Native integrations with Dropbox, Google Drive and OneDrive (with Box coming soon).

RMS 2.0 Support

Protect documents at the file level, including support for protected PDF and PPDF files.

Active Directory integration (coming soon)

Enable deployment at scale via SAML connection or Active Directory agent.

Faster. Smarter.

Nitro for Enterprise

The enterprise-grade document productivity solution that can transform your business.
